

Environmentally Dependable to Protect a Dependable Environment

- IB Roof Systems products are “Cool Roof Ratings Council” approved and recommended.
- IB Roof Systems products meets Energy Star criteria and is an Energy Star Partner.
- IB Roof Systems white membranes are Title 24 compliant.
- IB Roof Systems receives and ships products by rail when possible to minimize fossil fuel consumption.
- IB Roof Systems has complete specifications and product lines for garden roof applications.
- IB Roof Systems recycles all scrap and waste PVC, wood, and metal products.
- IB recycles 20% pre-consumer edge trimmings and other excess materials back into the membrane.

IB Roof Systems material is Energy Star™ approved and is registered and approved by the Cool Roof Rating Council, (CRRC), for solar reflectance and thermal emittance. Not only does IB meet these environmental standards but can offer a 25 year 100% material warranty, which means that our roof system is guaranteed for 5 more years than our competition, at least 5 more years before re-roofing, and 5 more years to allow technology to create more efficient ways of recycling and better use of the recycled product.

High Performing Green Manufacturing

IB Roof Systems’ manufacturing partner has earned several environmental awards that make it among the most environmentally friendly in the industry. Below are some reasons why:

- Two-time winner of the Recycling Council of Ontario’s Waste Minimization Award for diverting up to 90% of process waste from landfill (totaling over 3,400 tons). None of the materials from construction products go to landfill.
- First vinyl manufacturer in North America to achieve ISO 14001 Environmental Management System Standard.
- Completed an air emissions abatement initiative in 2003 that reduced air emissions by up to 90%. This involved the use of regenerative thermal oxidizers.

IB is proud to have this environmental record associated with our products.
