Hand Welder Kit

Product Details

Membrane Scissors: Made of stainless steel and can be resharpened. These scissors are used for field and detail work. They are equipped with rounded safety point and comfort grip.

Membrane Slitter: A very comfortable membrane cutting tool. It has a non-slip grip, and the razor blades are replaceable. The membrane slitter can be used to cut accurate lines.

Silicone Hand Roller: Used in conjunction with the hand held heat gun to roll membrane behind the heat gun. The wooden handle is formed to fit hand for comfort.

Seam Probe: Used to slide along all welded seams to check for welding imperfections.

Leister Hand Welder: This light weight hand held hot air welder has a small diameter handle making it very comfortable to weld. These welders are extremely reliable, durable, easy to handle and great for getting into tight places.

Note: All items in the hand welder kit are available for individual sale.

Type	Triac S	
Voltage	V~	42, 100, 120, 200, 230
Power Consumption	W	1000 1400 1600 1400 1600
Frequency	Hz	50/60
Temperature	°F	68-1292° steplessly controlled
Air Flow	l/min.	max. 230
Pressure Stat.	Pa	ca. 3000 (30 mbar) after 24h operating time
Emission Level	L _{pA} (db)	65
Size	in.	4" x 13", Handle 2 1/4"
Weight	lbs.	2.8lbs. with 10' cord
Approval Mark		CCA certified
